Specially formulated for transportation or temporary storage of soiled surgical instruments and reusable medical devices prior to reprocessing, Belimed Protect™ Pre Treat Spray is applied as foam, and over time undergoes an innovative and advanced transformation which leaves a liquid gel on the surface of reusable medical devices. The dense cover, prevents drying of bioburden and initiates cleaning upon contact, breaking down blood faster than leading competitor products.

- Dense foam/liquid gel—even coverage prevents instruments from drying and begins to break down soil upon contact
- Foam/gel concentrate minimizes cross contamination by encapsulating bioburden—unlike other aqueous pretreatment sprays
- Gel transformation traps moisture—easy to rinse off
- Broad material compatibility—protects instruments

Order Details
750 mL

For the pre treatment of instruments
Apply generously at point-of-use (prior to transport). Manually rinse thoroughly before automated reprocessing or alternatively skip manual rinse and integrate two rinse steps into the WD process. Device manufacturer IFU should be consulted for cleaning instructions.
Instructions for Use
Always rinse product from medical device surface prior to reprocessing in automated washer. Please follow manufacturer’s recommendations for reprocessing of medical devices according to EN ISO 17664. For more details regarding instrument reprocessing visit www.a-k-i.org.

Safety Information
For safety and handling please refer to Product Safety Data Sheet.

Associated Products and Services
The Belimed Protect™ range of chemistries has been developed and validated with Belimed Washer Disinfectors and AERs to meet the cleaning efficacy requirements of medical devices according to consistent and repeatable standards outlined in EN ISO 15883. For further support regarding optimisation of your cleaning process and/or troubleshooting, please contact your local Belimed representative.

Product Properties Overview
This chart is for guidance only.

Belimed Protect™ Symbols—Recommended use
- For automated reprocessing in WDs/AERs
- For manual reprocessing
- Safe for use with flexible endoscopes

Belimed Protect™ Colour Coding System—Product category
- For cleaning
- For disinfecting
- For neutralization
- For rinsing and drying
- For maintenance and care
